To: leyden@mailhost

OK to change the document. By the way, I found out today that the meeting on Jan. 3 should include a presentation of this stuff. I may need your help in making sure there is enough info to put together a parallel construction across INBIFO, FTR and us.

To: Ellis, Cathy

Cathy,

Central Files signed out the ETS search document in my name. If you are not certain that this can be returned to Central Files, perhaps we should change that before
you take it to New York. I don't want to have to deal with a document issue later.

Let me know how you would like to handle it.

Don

To: Firestone, Marc

Marc:

I think it looks good. The only potential PR issue is saying that nicotine is "lost" in the process (pg 2 D, and pg 3 last paragraph - 2 times). Nicotine is a hazardous waste. Implying it is "lost" and that we can't account for it, doesn't look good. An example of a potential reword would be " this process results in approximately a 25% reduction of nicotine in the tobacco."

Ray:

It would be helpful to know who the birdie is.

I just don't see Pete being involved as indicated.

Afterthought:
It would be helpful to know who the birdie was.

P.S. I just don't see Pete being involved in this.

Ray:

I'm not aware of this but will check.
Second, who said you couldn't have a "budget for implementing seamless and secure access to external world-wide services as required"?
